Manual Filling Machine
Type A1001

Performance:
- 3 litre up to 240 bags/hour
- 5 litre up to 200 bags/hour
- 10 litre up to 120 bags/hour

Technical Data:
- Filling range: 3 ... 20 litres
- Compressed air pressure: 6 bar
- Voltage/power: 230V (50Hz)/16A
- Control voltage: 24V

- Can be used to process nearly all liquids
- Robust stainless steel construction
- High-quality equipment components
- Good operability
- Maintenance friendly design allowing good accessibility
- High operational availability through precise component processing
- The machine fulfils the CE Safety and Construction Requirements

Function sequence
After having manually inserted the bag, the sealing plug is removed with a hand lever operated gripper and the filling valve is placed onto the bung. The filling process is then began via the start button. When the filling process has been completed, the sealing plug is placed onto the bung using the hand lever and pressed into the bung. The hand lever is returned to the start position and the filled bag is removed.
